

ASSIGNMENT 2

Following are the three probable titles -

1. Effects of RF-EMF exposure on Brain.
2. Electronic Devices making our adults an Insomniac.
3. Electronic devices emitted short-wavelength, artificial blue light can cause trouble in your Body's internal clock.

Among the above **titles second titles is most accurate** and precise in terms of Medical science's because, it's a serious chronic disorder that can make it hard to fall asleep, hard to stay asleep, or cause you to wake up too early and not be able to get back to sleep. You may still feel tired when you wake up.

Using this term in the title itself draw's more attention of Medical community and more intensive research will be conducted in coming future while other two title's are not containing any specific details about harmful effects on human body.

It should not only about Publishing a paper only ,but your research can make a difference in other's life also.
